

Business Web Hosting

Last Updated Sunday, 18 May 2008

Now with FREE Site Builder Pro site builder For trouble free operation, features, flexibility, ease of use and value for money, you cannot go past our Linux based Business web hosting plans, starting from just AU \$15.00 per month. Our Business web hosting plans use the popular Cpanel control panel, and support all of the usual programming technologies, including PHP, Zend Optimizer, MySQL databases, FrontPage extensions, Perl, CGI etc. However we also include many other features as standard, including:

- Free sub-domains
- Free domain parking (if you have more than one domain name that you want to point to the same web site).
- Free multiple domain hosting (host 2 or more web sites on the one plan! See the chart below to see how many sites you can host on the one plan).
- FREE POP email hosting
- Free spam email filter
- Free scripts auto-installer
- Free site builders (Not all site builders suit everybody. So we have included not just one site builder, but two! Of course you or your web master can still build your site using your favourite HTML program such as Dreamweaver, Front Page etc)!
- Many other features too numerous to mention here! All the features in the world are of no use to you if your web hosting service is unreliable & you cannot get the support you need. Our company is renowned for the quality of support provided, as well as the reliability & uptime of our web servers & network. Whether your web site has 100 visitors a month, or over 5 million visitors per month, if you are running a business online, can you afford to be with another company who loses your data, or who's web servers are constantly offline for hours, or even days at a time. View our plans features on the chart below, & then click on the 'Order Now' button to order. All pricing of our web hosting plans are in Australian dollars and include GST. Services
