

Hosting FAQ -site builder

Last Updated Sunday, 18 May 2008

You have your domain name registered & your web hosting plan setup. So now what? You need a web site! What are your options? Option 1: Pay a web design person to build you a web site - Can't afford it? then try - Option 2: Build your own web site using a HTML program such as Dreamweaver or Front Page - Don't have it / don't know how to use it / cant get it to do what you want? then try - Option 3: Use our Plan Site Builder to build a powerful database driven web site with a shopping cart for selling your products, form builder so you can collect information from your site visitors, eNewsletter module for keeping in contact with your customers. secure login manager for membership or VIP access, event calender manager, blog manager & much much more! With our Hosting Plan Site Builder, you don't need to know FTP, HTML, PHP or SQL. You don't need to pay a web designer to build & maintain your web site. You don't need to own or learn how to use expensive & complicated web design programs such as Dreamweaver or Front Page. You also don't need to do a course on web design! Whether you want a simple brochure style web site, or a fully featured ecommerce web site with all the bells & whistles, we have a site builder package to suit with an easy to use site editor to get you up and going in no time. Our site builder solutions are simple to use, so even a complete novice can build a professional looking fully featured web site within a matter of days, if not hours. However our site builder also has the power & features required to build extremely complex & powerful ecommerce web sites. So much so, that many professional web designers are also using our site builder to build web sites for their customers. Instead of the days or weeks it usually takes them to build a web site using traditional methods, web designers are finding that they can build a powerful full featured web site for their customers within hours. Our site builder Pro site builder even allows you to use your own custom template designs, so every web site built can be unique. Not only does our site builder package allow you to build a powerful full featured ecommerce web site, it also provides the tools to keep in contact with your customers. Keeping in regular contact with your customers through newsletters & blog's is one way to keep your customers coming back to your web site again & again, & making more sales. There are 3 site builder packages to choose from, ranging from our Basic site builder package, which is FREE with any of our Budget web hosting plans, our PRO site builder which is Free with any Business web hosting plan, through to our Site Builder with 'The Works' which is Free with any Ecommerce web hosting plan.
